

For more than 30 years, Machine Tool & Fab Corp. has designed and built specialty machinery for food processing, automotive, plastics, rubber and many manufacturing industries. This machinery includes:

- Prototyping of projects
- Part transfer and assembly
- Automated drilling, punching and sawing machines
- Automated bonding equipment that included gluing, stapling, welding and staking
- Repair of dies, tooling, pumps and anything that moves
- Q. A. and process inspection fixtures & machines
- Integration of Robotic operated assembly lines

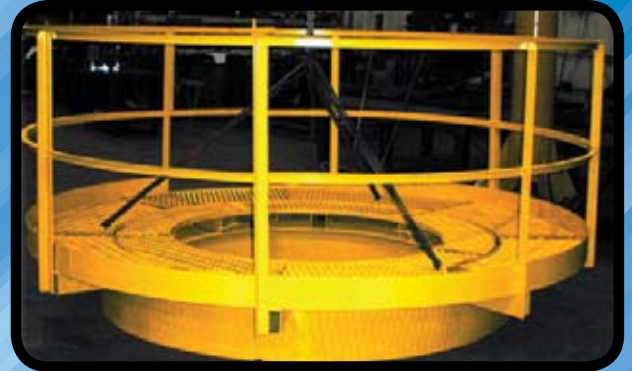

Machine Tool & Fab Corp. also manufactures Para-Port Doors. These doors range up to 145 feet wide and 50 feet high and are used worldwide in aviation aircraft hangars and large industrial and commercial facilities. Learn more at www.paraportdoor.com
